

MultiModules system

# 43m<sup>2</sup> finished every day

Our concept is used for all kinds of buildings - schools, institutions, offices and camp-sites. Our buildings observe all existing rules and norms for the temporary use.

## Competences

We have licensed sewer-plumbing and heating-and electrical engineers with approved quality control and undertake all jobs as turn-key projects. A new undertaking is our sister company ABC Inventar A/S, which produces and delivers furniture and equipment for all purposes.

## History

The company has existed since 1999 drawing on the experience of the last 35 years of production of industrial prefabrication for both private and public houses. ABC Pavillioner A/S is a member of the Building Trade's Evaluation Centre and the organisation Building Guarantee.

## Warranty - Price

We always offer a fixed price on our tasks, just as the different trade groups are subjected to continuous quality control.

### Facts

655m<sup>2</sup> administrativ building with 70 working places.
